

DB SCHENKER

Close to your clients

We launch an eco-friendly service package for the needs of e-commerce and consumers, that is ecological and easy to implement. At DB Schenker we target the use of renewable fuel also for transports of collection point shipments and this way we want for our part support environmental protection and sustainable development of natural resources.

Our DB Schenker collection points can handle all package types up to 20 kg. Have your customer's order delivered to the closest collection point or order a pick-up service. Your customers can choose from nearly 1,000 DB Schenker collection points.

DB Schenker in Finland deploys Neste MY Renewable Diesel produced from wastes and residues. In the future e-commerce deliveries will have up to 90% lower greenhouse gas emissions than before.

Improve the efficiency of your e-commerce by linking your online store with our range of services.

- Place a transportation order and print address labels online.
- Provide your customers with guidelines on delivery methods available on your online store.
- Improve the shopping experience of your customers by integrating the collection point service into your online store.
- Electronic tracking can be made available to you or your customer.

Your consignment will reach our collection point in 1–2 working days. We will notify your customer when the order is ready for pick-up at the collection point. Your customer can pick up the order according to their own schedule. Our collection point network provides extended opening hours and convenient locations and covers now also parcel lockers.

Our experts can assist you in solving any logistical issues related to your e-commerce. Call 010 520 or visit us online at www.dbschenker.com/fi.
