

# Rail Logistics Forwarding - tailored to meet industry requirements

## for rail-based transport solutions

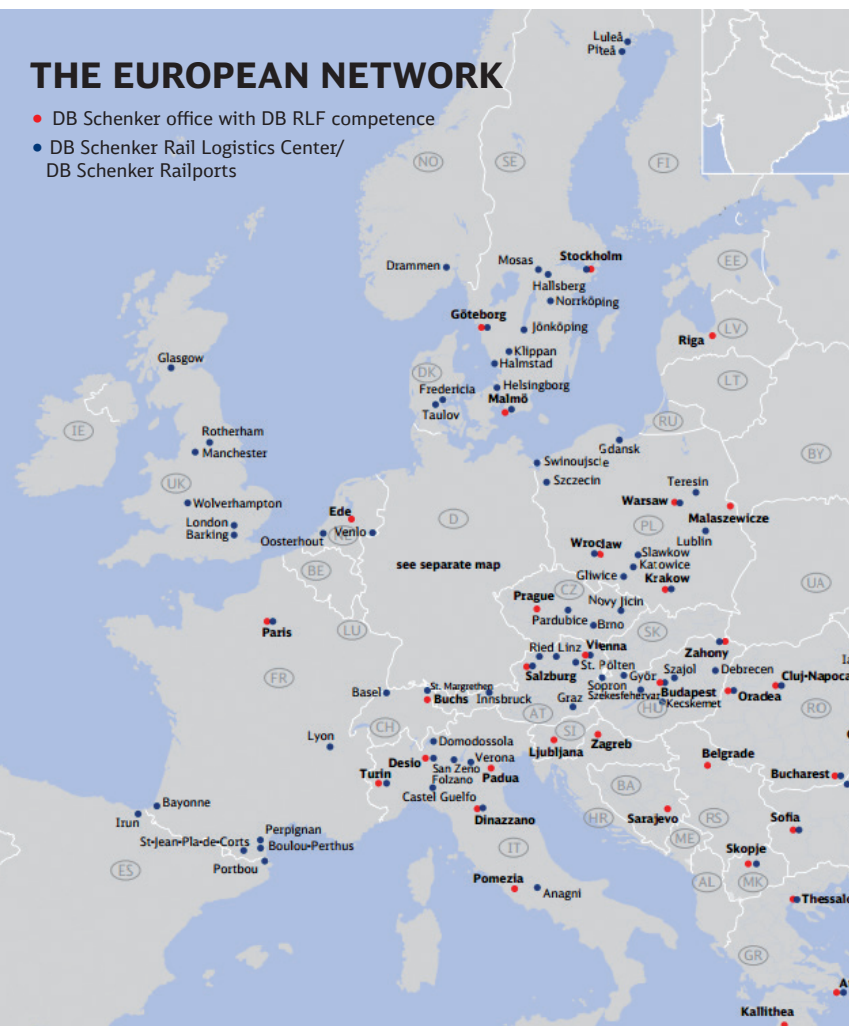

DB SCHENKER takes on the responsibility for all processes involved – from the organization and coordination of pre- and on-carriage as well as purchase of freight capacity to the scheduling of single wagon and containers including the handling of customs procedures. All services from one single source.

Some industries are predestined to use rail transport, e.g.:

- Clay, tiles and building materials
- White goods and consumer electronics
- Wood
- Furniture
- Steel and metal
- Paper
- Beverages and various food-stuff
- Special transports (e.g. agricultural and construction machines)

### THE EUROPEAN NETWORK

- DB Schenker office with DB RLF competence
- DB Schenker Rail Logistics Center/  
DB Schenker Railports

### What DB SCHENKER offers:

- Organization and clearing of single wagon, wagon groups and block trains for wagon load freight and combined transport services
- Purchase of freights from nearly all European railway companies
- Organization and coordination of pre- and on-carriage as well as transshipment services
- Warehousing and use of DB Schenker railports and rail terminals
- Ordering/dispatching of wagons (rail-owned, private) and container
- Technical consulting (wagon type, loading, security etc.)
- Cross-border shipment monitoring and tracking, in case of delays, proactive information on deviations and expected time of arrival
- Customer specific invoicing and variable terms of payment
- Total customs administration
