

Value added services for domestic land transports in Finland

Extra assistance service

DB SCHENKER*system*, DB SCHENKER*system home*

The nature of the consignment sometimes requires extra assistance for loading/unloading or delivering via staircase or indoors. An electronically ordered value added service, where the consignment is delivered over the threshold. The service does not cover deliveries between apartment's floors or the sorting of packages into several rooms. The consignee ensures that the route is accessible and, if necessary, the floor surfaces have been protected. The consignee checks the quantity and condition of the products before acknowledging receipt.

The distribution days are limited and the availability area includes the local areas of our terminals and the remote area1 of our Vantaa terminal.

Maximum dimensions of a shipment:

- weight of a single parcel 60 kg
- tax weight 2,500 kg
- actual weight 1,000 kg
- volume 7.5 m³

It is possible to handle certain household appliances in the factory packaging by two persons using different means of transport, in which case the maximum weight of a single parcel (60 kg) may be exceeded. This requires free access to the destination. The shipment must always be portable by two persons.

Larger batches by a separate agreement.
