## Make Your Supply Chain Efficient & Sustainable

Flexible order process

Improve customer satisfaction

Reduce your supply chain costs

Transport cost reduction

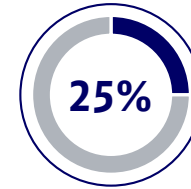

Continuous cost optimization with one global platform

**The Logistics Orchestrator is a new digital platform** that is smarter and more efficient at managing your global supply chain business. The platform allows centralized management of orders within a global distribution network. Processes are precisely predefined by DB Schenker - according to specific customer needs, so orders can be managed automatically.

## Increase Your Service & Decrease Your Costs

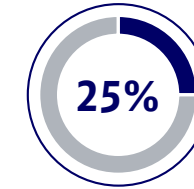

ATP increase

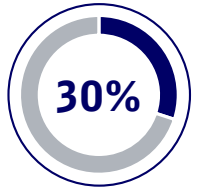

Lead time decrease

SC admin cost reduction

Stock reduction

**Optimizing inventories and cutting delivery times:** the Logistics Orchestrator is designed to further improve the provision of products to customers in the industrial and consumer/ retail sectors. The software boosts the availability, e.g. of spare parts in globally streamlined supply chains, and herewith helps reducing stocks and shorten delivery times to end-customers.
