

# This is how you invoice DB Schenker companies

DB Schenker companies in Finland accept purchase invoices as e-invoices. **We do not handle printed invoices.** By using electronic invoicing we save resources and the environment. Due to the smooth circulation of invoices, we require the correct information be used.

## Do not forget to check

- **Name of the company to be invoiced**  
Enter the name in a correct format (e.g. **not** DB Schenker Oy). We will ask for a corrected version of invoices for the wrongly named company, which will slow down the payment.
- **Purchaser’s email address as reference** in "Your reference" field (first name.last name@dbschenker.com)
- Possible **order or contract number**  
In e-invoices order and contract numbers are entered in their own fields.
- We generally use a **60-day payment period** in our purchase invoices.

## e-invoicing IDs
