Ocean Freight **Info**

Oslo, 27.10.2020

Dear Customers,

Following the ease of lock down measures in countries across the World and the gradual return to production, the ocean freight market, in particular ex Asia, experiences a very strong demand of export volumes which is exceeding the supply.

Due to Christmas arrivals in Europe it has been decided by many carriers to further blank services in November. At the same time, the on-going equipment shortage since beginning of September is getting more serious in Asia.

Please note that equipment and space demand is by far exceeding the demand.

As a consequence, the current peak continues with rate adjustments and rate levels have been climbing up further.

Our key focus remains to manage your supply chain proactively.

As from 1st November (loading date at origin) until further notice, the Peak Season Surcharge for the trades from Asia Pacific to Europe will be charged with following amounts:

LCL: **USD 11 w/m**
FCL: **USD 350/20', USD 700/40'dc/hc**

We will do our utmost to keep any extraordinary cost as limited as possible.
