SCHENKER*ocean* Peak Season Surcharge
SCHENKER*ocean* Equipment Imbalance Surcharges

Dear valued customer,

Following the heavy Peak Season months in Asia Outbound Trades and the gradual return to production, the ocean freight market, in particular ex Europe, experiences a very strong demand of export volumes.

Furthermore, there is a severe Equipment shortage in Europe. In addition, the average European outbound schedule reliability is below 40% which decreases the supply of capacity. The demand is by far exceeding the equipment and space supply.

The rate adjustments and rate levels are climbing higher as the existing peak continues. Our key focus remains to manage your supply chain proactively.

SchenkerOcean, Inc wishes to advise our valued customers of changes regarding Peak Season & Equipment Imbalance Surcharge as follows with effective date March 1st, 2021 until further notice.

SURCHARGE	CONT.TYPE	TRADE	CURRENCY	20'	40'	valid from
