# Advisor Company Relocations

## Our tips from A to Z

### Budget planning

Do you need a cost estimate? We determine the total volume and develop a first possible schedule.

### Disposal

Are some items of your inventory no longer required? We take on the disposal, naturally in an environmentally friendly manner and documented.

### Equipment

Which technical equipment can be sensibly used for your move? Exterior elevators, air-suspension removal vans as a rule with elevating platform, transport trucks, stair climbers, sack boxes, pallet trucks, air cushions, fork lift trucks, acclimatized art trucks, truck cranes, low loaders etc.

### Flexibility

You are looking for a partner who can take some of the burden off your shoulders by providing you with a broad range of services and yet still allows space for your own resources? We integrate your staff into the overall project. This means you can input your own know-how and save costs. You make use of our services according to a modular system up to and including "turn key".

## Our tips from A to Z

### Industry Service

Are you considering renewing your machine stock as part of the move? In this case we know the right specialists.

### Current / target situation

Are the entrances to your company too narrow, is your firm situated on a main road or in a residential area? If so, it is essential to make the necessary applications for no-stopping zones or other traffic necessities in good time so that permits can be obtained punctually from the authorities responsible.

### Coordinated plan

We guarantee that your boxes and furniture will arrive exactly at the destination that has been chosen for them! On the one hand, the system is simple and catchy, on the other hand, it is distinctive and unambiguous. We select the right system for your needs in consultation with you. That's why nothing gets mixed up!

### Assembly

Does your furniture or machinery have to be disassembled? Our technical team ensures that all the parts disassembled for the transport journey correctly assembled after the move. We supplement our teams as need be with carpenters, electricians or metalworkers.

## Our tips from A to Z

### Project management

Do you prefer a direct contact partner? Our project manager is involved right from the outset and is always on hand as a contact partner during the entire move.

### Packaging

Do you want to decide to whom you entrust your pictures, models or other valuable objects that require special attention? You can rely on our trained packers. At DB Schenker we have specialists for everything. From soft packing to specially produced wooden crates - we find the right solution.
